HAMMESFAHR® PROFESSIONAL BARBER SCISSORS

Top quality Japanese steel 440C is the starting point for our professional Hammesfahr® barber shears assortment.

With a guaranteed hardness of 60 HRC (tolerance +/- 1) our barber and thinning shears have a long standing time and due to the ergonomic shaped handles the shears are light and easy to use. The concave cut shear blades have a convex shape with a consistent ride line and therefore perfectly usable for slicing.

For extension of the life cycle the shears can be delivered in an attractive and exclusive case including small bottle with oil and leather cleaning cloth.
