PROFESSIONAL INSTRUMENTS

The Profi4Beauty pliers and instruments are specially selected for the professional beauty user. Our pliers are made of top quality Japanese stainless steel and extensively tested on several points as hardness based on the quality standards of the Solingen Stahlwarenindustrie. These quality checks give you the security of long and intensive usage.

All manicure- and pedicure instruments can be safely cleaned or ultrasonic disinfected.

Hammesfahr offers a complete range of pliers for manicure- and pedicure usage and also special instruments for diabetics.

The top quality and handmade European manicure- and depilate instruments such as the original automatic tweezer Epilmatic® complete the pliers to a very complete and exclusive assortment.
